master switch**

**7 switch plus
master switch**

FEATURES

Panels are available in two colours White & Black.

When switch is operated, ON is indicated by blue light and OFF no light, in case of master switch blue and red indicates two different positions only.

These products operate with Touch & Remote. The remote is based on RF technology, which has the feature to operate in any direction (360° rotation).

Dimming: If the panel remains in standby condition for 30 seconds then LED intensity will reduce to 30% of the maximum intensity automatically so that LED's does not create disturbances in dark.

Auto Wake Up: Auto wake up is the gaining/reaching back of LED's to its normal intensity when switch is operated.

FEATURES

Memory Storage On & Off: The Master Switch has the advantage of storing the memory of the previous operation. It has the facility to clear the memory also. For this keep holding the master switch for 9 seconds then the LED will blink and memory gets cleared and on holding again for 9 seconds memory storage is ON or vice versa.

Master Switch: The function of master switch is toggling the position, when it is pressed all the switches in the module gets OFF and when it is pressed again switches regain the previous position.

Scene Operations through Remote: On remote you will have scene combinations by which you can have mood lightings.

FEATURES

For 7 Switch + Master :

a) Scene 1

Switch 1, 2, 3 ON rest will get automatically OFF.

b) Scene 2

Switch 4, 5 ON rest will get automatically OFF.

c) Scene 3

Switch 6, 7 ON rest will get automatically OFF.

- Scene button on remote are only for 7 switch + master switch panel.
- The remote operates at a frequency of 433MHz.

FEATURES

- One remote for individual panel and also if require single Remote will be working for multiple panel (7 switch + master, 4 switch + master + fan + regulator & Blind control) also available.
- Remote has onsite Learning capability, to load the program of panel onsite, install the panel and touch second switch from left and master switch simultaneously for 10 to 15 sec till master switch start blinking, at that movement press any of 1 to 7 switch for 7 switch + master switch or 8 to 11 switch for 4 switch + fan switch + regulator + master switch panel or '+' or '-' for the Blind Control panel.

Terms & Conditions:

- Identification on Remote can be done on the demand of customer. (For example: If any customer needs the identification on remote as Room, Hall, Kitchen etc. it will be done on the Customer demand). Efficiency of remote operation is dependent on external factors like construction of dwelling, presence of steel structures in vicinity of panels etc.
